

T.F. Hudgins Fluid Analysis Service

*Protect equipment, boost productivity,
reduce maintenance costs*

Benefits

- Extend oil drain intervals
- Avoid major failures
- Reduce maintenance costs
- Maximize asset reliability
- Extend equipment life
- Increase resale value

T.F. Hudgins Fluid Analysis provides diagnostic testing to evaluate lubricant condition, component wear and contamination in mobile and industrial equipment applications.

Complete Testing. Monitor metals, water, viscosity, fuel dilution, soot, TBN, oxidation nitration – and request special testing to suit your specific needs.

Fast, Online Information. View the progress of your samples online, with results displayed almost immediately after processing is complete.

Management Assistance. Online reports track equipment and lubricant condition, providing helpful management information to improve the effectiveness of your testing program. All recommendations come with complete justification.

Results You Can Trust. All testing is provided by ISO 17025 A2LA accredited laboratories – the highest level of quality attainable.

Testing Made Simple. It's never been easier to manage a productive, cost-effective reliability program. Prepaid testing packages are available from \$12 to \$18.

Get started today! Call 800-231-7746.

A screenshot of a fluid analysis report from T.F. Hudgins. The report includes a header with the company logo, a table of test results with columns for 'TEST', 'UNIT', 'RESULT', and 'LIMIT', and a color-coded status bar at the top right showing levels 0, 1, 2, 3, 4, 5.
